Dear San Francisco Planning Department,

I wish to submit my comment for the public record regarding the Balboa Reservoir Project. I am concerned that the project will have adverse environmental, social, and physical impacts on the surrounding homes, businesses, and especially on City College of San Francisco

The drastic increase in population density of the area will increase traffic, including from Lyft and Uber.

The increase in delivery traffic passing through the entrance along Frida Kahlo Way will affect students' getting to class and the bus lines.

The development will increase the population in the area substantially without increasing the infrastructure and availability of commodities such as supermarkets.

The area is already at the peak of transportation congestion and the addition of this many more new households will further increase this congestion.

Sincerely,

Lawrence E. Bernard
