Subject: RE: SF City College Boundary Survey

Hi Bruce,

The purposes of this is to provide the college with a full topographic and boundary survey, our client is the college.

We have obtained CCSF monument/dedication maps, surrounding recorded surveys/parcel maps and field notes from historic City surveys as well as CalTrans maps. We have the deed for the subject property and some surrounding properties. Attached are just some of the records to give you an idea.

Thank you,

Kelly

What is this for?
Who's your client?
What research have you done so far?

Bruce

I notice it is not signed by the performing surveyor and we did not find any of the monuments said to have been set, which made me think maybe something odd happened at that point regarding this survey? Anyways, we plan to be recording a survey eventually and have began monument ties from the monument maps and available records to establish this boundary. It appears so far that a portion of the property is within Ocean Avenue.
