I had sent in a comment regarding the geographic context for analysis of transit delay yesterday, 9/9 /2019.

I said that the appropriate geographic context would be the the BPS Area Plan's "Project Area."

However, on closer examination, I realized that the BPS Project Area's northern boundary was Judson and Havelock, and did not even include Riordan.

The geographic context for analysis needs to extend beyond the BPS Area Plan's northern boundary of Judson to include Monterey Blvd.

Although not inside the BPS Area Plan's boundaries, the Reservoir Project will impact areas north of the Reservoir lot itself and north of Judson.
