Please deliver to Jeanie Poling, Senior Planner in the Planning Department, my heartfelt objection to the Balboa Reservoir Draft Subsequent Environmental Impact Report. As a San Francisco resident since December 20, 1955, a 15-year member of the Board of Supervisors, and a 12-year State Senator representing the area in which the City College of San Francisco campus is located, a commencement speaker at City College, a lecturer in various City College classes since 1985, and public user of City College facilities, including its wellness center, the proposed EIR minimizes the effect of a horrendous private development of the Balboa Reservoir acreage. I am informed of a proposed construction of 1,100 residential units and a different plan for 1,550 residential units by the City and County of San Francisco, with heights from 25 feet to 88 feet. The affect upon City College will be enormous in terms of parking loss, and the EIR is limited to just the reservoir acreage. Moreover, if either of those two projects is built, that will constitute the "baseline existing condition". Any future City College facilities must not violate with adverse effect on the so-called reservoir project.

City College is a cultural and economic factor to the neighborhood and the entire City and County of San Francisco. Revise the EIR accordingly to reflect all such adverse effects.

Yours truly,
Judge Quentin L. Kopp (Ret.)
