As with previous submittals, page number references are all formatted and cross-referenced by our Pubs team, so there's no need to update those in your review. As you move through your review in track changes, page number references will automatically become obsolete and inaccurate, but our Pubs team updates page number references with each new draft you see as part of their formatting of the document.

If the cross-reference field track changes are distracting, please take the following steps: (1) turn off track changes, (2) select all (ctrl+a), (3) press F9. Taking these steps will clear up the cross-referenced fields. Turn track changes back on and you can continue with edits. Hopefully this eases your review a bit.
