Subject: Addressing Pandemic Issues in Street and Sidewalk Design

NACTO (National Assn of City Transportation Officials) released today (May 21, 2020) ***Streets for Pandemic Response and Recovery***. It looks at how streets may need to be reshaped and resources deployed differently with the pandemic. https://nacto.org/wp-content/uploads/2020/05/NACTO_Streets-for-Pandemic-Response-and-Recovery_2020-05-21.pdf

Can you assure the community that this has been reviewed and appropriate changes have been incorporated into street and sidewalk design for the Balboa Reservoir project? This is a rare opportunity to incorporate them into the design phase rather than attempting to shoehorn them in later.
