Together, the 28 19th Avenue and 28R 19th Avenue carry about 15,000 customers everyday, making the corridor one of Muni's busiest. As part of Muni Forward, SFMTA is proposing transit priority and pedestrian safety improvements along the route that will make it safer to walk, increase the

frequency and reliability of service, and enhance the customer experience—on and off the bus. This includes optimizing bus stop locations, increasing bus stop spacing, and adding pedestrian and transit bulbs along 19th Ave.

By the Numbers:

Expanding 28R service to all day service means a less crowded and more reliable ride.

San Francisco's Vision Zero policy seeks to eliminate all traffic-related fatalities by 2024.

Muni Forward will play a big part in this effort by enhancing

pedestrian safety at intersections with engineering measures like sidewalk bulbouts which increase visibility of people walking and shorten crossing distances.
