Subject: Balboa Reservoir noise section reviewed
Attachments: to update_3C_Noise.docx.mflink

Hi Chris –

I have finished reviewing the noise section (linked above). All previous draft comments appear to have been addressed. Reviewed section is due to Jeanie by May 17th.

Jeanie has organized the files into traditional folders on M-Files and provided the following instructions:

The administrative draft SEIR-2 sections and screencheck initial study are in this traditional folder:

M:\Planning Production\PPTS Records\2018-007883ENV_Balboa Reservoir\5_Environmental Documents\EP to update ADSEIR-2

All the Word files to update are entitled “to update,” so please add your edits directly to the appropriate file.

The redlined pdf files with the tracked changes from the previous submittal are in this traditional folder:

M:\Planning Production\PPTS Records\2018-007883ENV_Balboa Reservoir\5_Environmental Documents\from ESA 04-29-19 ADSEIR-2

Thanks!
