Hi Olivia,

Please find the attached SFFD comments for Balboa Reservoir fire access.

Thank you,

Kamal Andrawes, P.E.
Fire protection Engineer
San Francisco Fire Department

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Captain Patt, Mike,

Rick Williams here, we met on Balboa Reservoir to go over the requirements for FD access and am collecting my notes and still have the diagram marked up which we did at the meeting.

One of my notes referred to a form you have for formalizing these decisions. (I have in my notes form 70? but that may be incorrect....)

Could you send me a pdf of that form and I will return it with the meeting s notes and diagram as well.

Thanks you ahead of time for forwarding this...

Rick

Thanks Captain Patt,

Would 8:30 be too early? or 9:00am if 8:30am is too early?

Subject: Fire Department Meeting on Balboa Reservoir
Master Plan and Development

Mike,

Thanks for meeting with us at the PUC earlier this week.
We are hoping that you and a Fire Protection Engineer
have some time in this coming week to meet with a
couple of our team to go over the basic Building Access
for the development.

You have seen the street layout and that discussion. I would like to meet with you and present our strategy for building access to each building. We will bring site plan with roads, buildings with number of stories and/or ht., and building type, and some measurements for the 150' truck access and hose lengths.

I hope to have that diagram completed monday morning.

I am available monday afternoon,
Tuesday morning
Wednesday morning.

Our office is at 333 Bryant at Second St. so I could come over at any of those days and times if you are available. 1-2 others from the project team may also attend depending on the day and time which works for you. You met them at the infra-structure meeting.

Let us know if you have any of those times available.

Thanks, Rick
