We had previously advised them to select from three options:

- Maintain concrete strip within 3 ft from face of curb, or
 - * Provide concrete pad underneath pavers within 3 ft from face of curb, or
 - * Coordinate with SFMTA shops and have your contractor install individual concrete foundations for each sign & meter post. Note that SFMTA shops may not identify the locations of our infrastructure until the sidewalk is done so your contractor will have to come back out and excavate the pavers

Should I offer one of these others if they don't like the first?

Can you provide me with something a little more specific in terms of what we want them to do? I'm not clear on what my response should be.

On Jun 3, 2019, at 5:30 PM, Hunter, Mari E <Mari.Hunter@sfmta.com> wrote:

The most important factor is a solid foundation in which to secure poles for signage and meter posts/bases—so it's okay that there are trees in the 3' zone but can't be pavers on top of dirt between trees and it would be good to review in the detailed design phase to confirm the location and spacing of any of the trees does not pose a problem

Hi all,

If one of you (James? Mari?) can provide me with a response to their question in response to meters/poles, you can all skip this meeting on Weds!

Here is our comment and their response:

City needs continuous 3' concrete clearance from curb for meters/signage, etc.

Adding more concrete at the curb will not allow for required street tree planting beds and throughway widths are already minimal. There is not enough space in the ROW to accommodate this. Suggest coordinating street signs and meters at detailed street design phase.

My sense is that putting off the signs/meters until later won't actually solve for the problem that they are flagging with our comment- it just pushes off resolution. What can we suggest instead?

Subject: RE: Balboa Reservoir Monthly Infrastructure Meeting

Hello all,

This is a reminder that we're having a monthly Balboa Infrastructure meeting this Wednesday at 11am at the PUC building (details below). BKF has been reviewing all the City comments on the latest MIP draft and would like to discuss a number of them in order to get clarification. Please review the agenda attached to see if your subject area is included.

Thanks, Leigh
