Subject: Drive Electric Earth Day event at City College of SF Ocean campus parking lot
Attachments: GGEVA DEED flyer SF 2019.pdf

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi,

You are receiving this email because the new garages being planned on the Balboa Reservoir and City College campus will contain chargers for EVs. If you would like to learn more about electric vehicles and charging them from those with significant experience, come by the Drive Electric Earth Day event at City College this Sunday. And if you are considering a model for yourself, test drives are being offered by EV dealers, primarily of electric cars, but also electric motorcycles, scooters and bicycles. High end models as well as more moderate and used electric cars will be represented. Owners of EVs, including many members of the Golden Gate Electric Vehicle Association, 350sf and Plug-In America will be on hand to discuss with you their experience of what it means to drive electric.

DATE: Sunday, April 28

TIME: 10AM-2:30PM

LOCATION: Parking lot by the City College MUB building

PRICE: Free, no reservations required

A flyer for the event is attached. I hope you can join us.

Regards,

Jennifer Heggie

Golden Gate Electric Vehicle Association
