Thank you! I will pass this on to the committee and I'll find some time to study this over the weekend.

Hi Jon,

They haven't released their TDM study so I cannot send it to you, unfortunately. But the College is preparing a presentation of the findings for the 6/10 CAC meeting and I asked them to let me distribute it to the CAC in advance of the 6/10 meeting.

They presented the report to their Board of Trustees on March 21 and I attached the posted presentation, which has a lot of good information. FYI – look at slides 18-21 for their assessment of displaced parking demand due to the development of the Balboa lower reservoir. They conclude that only 220 spaces on the lower reservoir are actually used on a typical week (rather than the 1,000 that exist). This is a great data point for us as we talk about having the developers accommodate a certain amount of CCSF replacement parking within their project.

We can discuss further anytime. Thanks, Leigh

Hi Leigh,

Has CCSF released their TDM yet? Do you have it?

Just wondering...
